DEVACON

ProReport
### Analysis Tool for Statistics

Data Analytics

Access and analyze critical corporate data with Devacon's web-based statistic tool, ProReport

Within one single platform, our visual data analysis solution extracts and prepares your data, as well as offering visual insights that will change the way you run your system. Efficient data access and analysis, as well as improved information distribution, can help your organization measure performance and increase profitability. 24 report types are at your disposal. Data is drawn from the Enterprise Express and ProDictate databases and reports can be exported as PDF or Excel files.

DEVACON

ProReport
Analysis Tool for Statistics

Interactive Analysis, Reporting, Visualizations and Dashboards

With interactive analytics, reporting, visualizations and dashboards, ProReport empowers analysts and other users to get the best possible use from the data available, across multiple dimensions and independent from IT professionals.

Comprehensive Data Analytics

A solution based on the integration of data business analytics speeds up the extraction of valuable insights from your data.

Benefits

Your internal processes made transparent

Easy to use interface

Your internal data use simplified

Large choice of report types

Eradication of the time-consuming data collection process

Consistently high quality reports

Individually configurable parametings

Analysis and report generation based on Enterprise Express Voice and ProDictate databases
